Basic information about the company

PREdistribuce, a.s.

Commercial name: PREdistribuce, a.s.

Registered office: Svornosti 3199/19a, 150 00 Prague 5

ID No.: 27376516, tax ID No.: CZ27376516

Legal form: joint stock company

Registered in the Commercial Register maintained at the Municipal Court in Prague, file ref. B 10158

Bank information: ČSOB Prague 5, account number: 17494043/0300

Holder of electricity distribution licence: No. 120504769 (valid from 1 January 2006 for an indefinite period of time)

PREdistribuce, a.s., (PREdi) operates and owns the distribution system in the capital Prague, in Roztoky and in Žalov covering an area of 505 km² in accordance with the electricity distribution licence in effect from 1 January 2006 for an indefinite period of time.

The key processes and activities ensuring reliable energy supply, operation and maintenance of the distribution network include the development and renovation of network assets in the licenced territory, the connection of new customers, buildings and structural units, optimum operation controls and the resolution of failures, the maintenance and repair of the network, measurements and other services related to electricity distribution.

PREdi was established as a separate company following the changes in the energy legislation aimed at harmonising the legislation of the EU member states. In 2004, Directive 2003/54/ES of the European Parliament and the Council of the EU concerning common rules for the internal market in electricity was transposed to the Czech legislation through an amendment to the Energy Act. It started the process of unbundling aimed at separating the distribution of electricity from trading in electricity and ensuring that an electricity distribution licence is held by a separate company.

That is why Pražská energetika, a.s., (PRE) established on 7 September 2005 a 100% subsidiary of PREdi, and, as of 28 December 2005, transferred a part of its business there (the Distribution division – i.e., the distribution network).

On 1 January 2006, PREdi started operating, assuming all rights and obligations of PRE, related to securing and operating the distribution system in Prague, in Roztoky and in Žalov; it also became the owner of the technical equipment and some of the immovable assets used for electricity distribution in this territory.

The PREdi's distribution system consists of 110 kV, 22 kV and 0.4 kV overhead lines and cable lines, distribution stations with 110/22 kV transformation and 22/0.4 kV network transformer stations. Distribution of electricity is subject to price and quality regulation by the Energy Regulatory Office ($ER\acute{U}$), which aims to optimise costs and prices for the use of networks, while ensuring adequate quality of electricity distribution and related user and customer services.

At the end of 2019, more than 809 thousand consumption points were connected to the distribution system. The highest load of the distribution network amounting to 1,162 MW was recorded on 24 January 2019. In 2019, the networks distributed 6,296 GWh on all voltage levels. Throughout the year, the quality standards of electricity supply and related services were met with regard to the customers connected to the distribution system in accordance with ERÚ Decree No. 540/2005 Coll., as amended. All output and energy demands of both the existing and new customers and investors of development projects in the licensed territory were met.

The company's scope of business

- electricity distribution;
- installation, repair, inspection and testing of electrical equipment;
- production, installation and repair of electrical machinery and devices and electronic and telecommunication equipment;
- execution of constructions, their alterations and demolitions; and,
- production, trading and services not listed in Appendices No. 1–3 of the Trade Licensing Act in the following fields:
 - repair and maintenance of domestic appliances, cultural objects, precise mechanical products and optical devices and meters;
 - advisory and consultancy services, the provision of expert studies and opinions;
 - lease and rental of movable assets;
 - preparation and creation of technical designs, graphic and drawing works;
 - real estate activities and the administration and maintenance of real estate; and,
 - testing, measurements, analyses and inspections.

A 100% subsidiary PREnetcom, a.s.

PREnetcom was founded on 27 November 2017 as a 100% subsidiary of PREdi, and started operating on 1 January 2018. Its main task is to fulfil the long-term strategic goals of PREdi – i.e., to implement smart grids by designing and constructing communication infrastructure to connect individual components of the distribution network, which will ensure reliable transfer of network data and enable remote control of the distribution network.

The company also explores the possibilities of using the spare capacity of the created communication network for other purposes, such as Smart City and Smart Home concepts. In 2018 and 2019, it implemented its first pilot commercial project in Prague's Skalka area and launched other pilot projects in Prague's neighbourhoods of Chodov, Vinohrady and Skalka II area. 2020 will see the continuation of the implementation of other pilot projects aimed at selecting suitable technologies, determining the overall concept and architecture of the communication network, including the standardisation of follow-up processes and technical solutions within the PRE Group's infrastructure.

PRE Group

Pražská energetika, a.s., (PRE) and its subsidiaries are a modern integrated corporate energy group, whose principal activities include electricity and gas sales and trading, electricity distribution, the generation of electricity from renewable sources and the provision of energy services.

PRE has a more than one hundred and twenty year long history of supplying electricity and developing the electricity system in Prague, Roztoky and Žalov. The history of the PRE Group companies dates back to 1897, when the Electricity Works of the Royal Capital City of Prague (Elektrické podniky královského hlavního města Prahy) was founded. Aside from electricity distribution, the company also operated trams and provided street lighting. Today, with its more than 809 thousand consumption points, the PRE Group is the third largest electricity supplier in the Czech Republic, operating a high quality and reliable distribution network. As part of its activities, it supports state-of-the-art technological solutions and provides consultancy on the implementation of innovative technologies and energy savings. Last year, it distributed almost 6.3 TWh of electricity on all voltage levels to end customers and generated 29 GWh of electricity from renewable sources.

In 2019, the PRE Group consisted of the parent company Pražská energetika, a.s., and its subsidiaries: PREdistribuce, a.s., PREměření, a.s., PREzákaznická, a.s., PREservisní, s.r.o., eYello CZ, k.s., KORMAK Praha a.s., VOLTCOM, spol. s r.o. (since 30.4.2019).

006

The PRE Group also includes the 100% subsidiaries of PREměření, a.s.: PRE FVE Světlík, s.r.o., SOLARINVEST – GREEN ENERGY, s.r.o., FRONTIER TECHNOLOGIES, s.r.o., WINDING WE NORTH a.s., and its 100% subsidiary of PRE VTE Částkov, s.r.o. (since 19.12.2019). The PRE Group also includes PREnetcom, a.s., a 100% subsidiary of PREdistribuce, a.s.

PRE Group companies

Pražská energetika, a.s., (PRE) holds licences for electricity and gas trading in the Czech Republic and its main business activity is trading in electricity and gas.

PREdistribuce, a.s., (PREdi) ensures electricity distribution in Prague, Roztoky and Žalov as well as the planning of the distribution system renovation and development and the construction, operation, administration and maintenance of the distribution system equipment.

PREměření, a.s., (PREm) carries out repairs, installation and readings of electricity metres in the PREdi supply territory and provides energy services to its clients, servicing and generation of electricity from renewable sources of energy.

PREzákaznická, a.s., (PREzak) provides complete customer services to the clients of PRE, PREdi, PREm and eYello.

PREservisní, s.r.o., (PREs) provides services to the PRE Group, including technical monitoring on behalf of the investor, diagnostics and measurements, property administration, etc.

eYello CZ, k.s., (eYello) sells electricity and gas to households and small businesses.

KORMAK Praha a.s., (KORMAK Praha) provides a complete range of engineering, design and construction services in the field of electricity infrastructure and transformer stations.

VOLTCOM, spol. s r.o., (VOLTCOM) focuses on the design of constructions, including the realizations of constructions, installations, repairs, inspections and testing of electrical equipment. It became subsidiary of PRE on 30 April 2019.

PRE FVE Světlík, s.r.o., owns and operates a photovoltaic power plant under a relevant licence.

SOLARINVEST – GREEN ENERGY, s.r.o., carries out installations of solar and thermal systems, such as air-conditioning units, heat pumps, etc.

FRONTIER TECHNOLOGIES, s.r.o., develops, produces and supplies indoor and outdoor smart lighting solutions.

WINDING WE NORTH a.s., and its subsidiary PRE VTE Částkov, s.r.o., focus on electricity production. It became subsidiary of PREm on 19 December 2019.

PREnetcom, a.s., (PREnetcom) develops communication infrastructure within the distribution network in connection with the implementation of smart grids.

Foreword of the chairperson of the Board of Directors

Distinguished readers

Looking back at 2019, I am pleased to say that PREdi managed to achieve its planned economic and operational results and it contributed to excellent economic results for the whole PRE Group. Its EBITDA reached CZK 3,201 million, surpassing last year's result. In 2020, the energy sector is bound to face many changes since the Czech government is expected to approve the amendment to the Energy Act, complete the National Smart Grid Action Plan, adopted by the government in 2015, and it is also supposed to lay down new regulatory principles and parameters for its fifth regulatory period from 2021.

PREdi, a 100% subsidiary of its parent company PRE, operates the distribution network in Prague, Roztoky and Žalov. In accordance with the Energy Act, it holds an electricity distribution licence from the Energy Regulatory Office (ERÚ). It is responsible for one of the key areas of the PRE Group's activities since its main mission is to provide high quality and uninterrupted electricity supply to all of its customers. As the operator of the distribution network in the capital, PREdi has a specific position in the Czech energy industry, and has to face extraordinary challenges and demands for high quality and reliability of supply. In terms of security, selected parts of the networks and operating equipment of PREdi are a part of the critical infrastructure of Prague and the Czech Republic.

008

PREdi's distribution system consists of a system of 110 kV, 22 kV and 0.4 kV overhead lines and cable lines measuring 12,372 km, 25 distribution stations with 110/22 kV transformation, and 4,906 22/0.4 kV network transformer stations. At the end of 2019, more than 809 thousand consumption points were connected to the PREdi distribution system, which represents nearly a 1% increase year-on-year. The highest load of the distribution network amounting to 1,162 MW was recorded on 24 January 2019, which is comparable to previous years. In 2019, PREdi distributed a total of 6,296 GWh, which surpasses its long-term average. The amount of distributed electricity is expected to increase further thanks to rising demand from investors to connect new developments and multi-commercial projects in previously undeveloped and suburban parts of Prague. We can expect the network load in Prague to increase by hundreds of MW, especially due to the expansion of electromobility, which is being prepared by PREdi in cooperation with Prague's municipal company Technologie hlavního města Prahy, a.s.

The company's main tasks include planning the renovation and development of the distribution equipment; connecting new customers; metering supplied electricity on the high and medium voltage levels; and transferring data to the system of Market operator for the purpose of settling distribution services and supplies. PREdi's task is also to manage the network assets, control the operation of the network, solve failures, and carry out planned network renovation and maintenance. All of the distribution equipment was taken care of by 455 employees in 2019. PREdi continues to supervise the activities of its sister company, PREm, where all the activities related to electricity metering on the 0.4 kV level were transferred thirteen years ago. As of 1 January 2019, PREdi transferred its 40 employees involved in servicing to its new company PREs. These employees carry out the tasks of technical and administrative work on constructions as well as diagnostics services. PREs can offer those services in the external market, where the demand is expected to rise.

2019 saw no large-scale technical breakdowns of lines, 110/22 kV distribution stations or 22/0.4 kV nodal transformer stations, which would have impacted the electricity supply to customers in Prague in a major way or would even cause a disruption in Prague's transportation system. The performance of the entire distribution system proves the trend of decreasing internal distribution failure rate in Prague. Throughout the year, the quality standards of electricity supply

and related services were met with regard to the absolute majority of the end customers connected to the company's distribution network in accordance with ERÚ Decree No. 540/2005 Coll. PREdi's level of reliability of energy supplies on all voltage levels is extremely satisfying, especially in comparison to other electricity distributors in the Czech Republic and major European cities. These positive results were achieved thanks to our engagement to a centralised and long-term strategy of planning and renovation, to the implementation of modern technologies and network parts used in the EU with high levels of reliability and security, as well as to the implementation of network restoration according to previously adopted corporate norms (the Code of Preventive Maintenance, in particular). To continue in and achieve ever better results, PREdi plans to implement additional technical measures in the years to come.

In 2019, the company invested CZK 1,643 million (including capitalisation) in the renovation development of the distribution equipment. It invested a further CZK 226 million in the repairs of equipment. The high reliability and quality of electricity supply in Prague reflects the amount of investments made in the distribution network. The restoration of equipment in an antiquated 110/22 kV Pražačka transformer station ranks among the most notable constructions of 2019. This transformer station, in service since 1985, is one of the most used in Prague. Its modernisation will be completed in 2020. Besides several other notable constructions in the 110 kV network and the construction of a cable tunnel from the 110/22 kV Karlín transformer station towards the Hlávka bridge and Invalidovna, we also carried out a high number of simple renovation projects to the 22 kV and 1 kV cable network and renovated distribution transformer stations which reached the end of their physical and accounting lifetime. PREdi also continues to fulfil its strategy of development of intelligent networks. The aim of it is to install new 22 kV, 1 kV cable networks and distribution transformer stations as smart grid ready. Digitalisation and smart infrastructure is carried out in line with the National Smart Grid Action Plan adopted by the Czech government. Given the expected expansion of decentralised energy generation and electromobility, smart grids will constitute a necessary condition for reliable operations of distribution systems.

I would also like to mention subsidiary PREnetcom, which started to operate on 1 January 2018. Its task is to implement smart grids by designing and constructing communication infrastructure to connect individual components of the distribution network, which will ensure reliable transfer of network data and enable remote control of the distribution network. Communication using optical equipment, which is part of distribution cables of medium and low voltage, will be used to ensure client data rollouts (AMM system). In 2019, PREdi successfully implemented its first pilot commercial projects in Prague's neighbourhoods of Chodov, Vinohrady and Skalka area. Other projects will follow, aimed at selecting suitable technologies and determining the overall concept and architecture of the communication network.

In conclusion, I would like to thank all of the company's employees for their dutiful work. It is thanks to them that PREdi met the task of energy distributor in the Czech capital, contributed to planned developments and with its reliably electricity energy supply it also contributed to the smooth and safe operation of the city. Thanks to their compliance with procedures and regulations, no serious injuries were caused, and our aim is to continue in this trend.

PREdi wishes to remain a stable and prosperous company, an irreplaceable part of Prague's life and a mainstay of the PRE Group. PREdi's objective is to fulfil the expectations of the shareholder in terms of planned profits for 2020. At the same time, it is willing to remain a modern company that fully acknowledges its responsibility towards the environment, energy savings and occupation health and safety.

Signed by

Milan Hampl

Chairperson of the Board of Directors

Company strategy

The primary mission of PREdi is to ensure the reliable distribution of electricity from transfer points with the transmission system to end customers' consumption and transfer points in the licensed territory covering 505 km² by using a well-maintained distribution system. This mission will gradually evolve into the transfer of electricity between individual points within the distribution system, but the underlying goal of ensuring reliable transfers will remain the same.

The main strategic goal is to continue optimising the network assets, ensuring their maximum utilisation for electricity distribution, and providing high quality and non-discriminatory services to network customers in cooperation with the other members of the PRE Group.

The otherwise conservative energy sector now faces changes to EU legislation in the form of the so-called Winter Package "Clean Energy for all Europeans", approved by the European Parliament and the Council of the EU in 2019. The sector will also have to deal with challenges related to the implementation of new technologies, which will undoubtedly require modification of the sector's structure and operation management in the near future. These changes and new challenges are common across Europe, with only speed and intensity differing in individual states.

Since the government approved the National Plan of the Czech Republic in the Energy Sector and Climate, the objective of the part of renewable sources in the production of electricity was increased to 22% by 2030. As a result, there will arguably be an increase in the deployment of decentralised electricity sources, where generation is difficult to predict. New technologies, such as electromobility, AMM and electro-accumulation, will also gradually expand. In connection to the strengthening of requirements for car emissions reduction, stipulated in the newly adopted regulation of the European Parliament and Council of the EU, electromobility in particular will gain in importance. The City of Prague has also increased its environmental objectives. It established the Committee for sustainable energy and climate of the Prague City Council, whose mission it is to draft specific measures aimed at fulfilling the identified objectives. As a distribution system operator, PREdi will continue to support these efforts while fulfilling its own obligations. Despite the changing conditions, distribution system operators will still be required to maintain a high level of reliability and security of electricity supply and its required quality, and to guarantee the supply even in crisis situations. There is a growing danger of abnormal operating conditions and blackouts, not only due to possible terrorist and newly also cyber attacks, but also due to the instability of sources and the overload of some transmission network components by huge transfers of electricity.

Distribution system operators have to find and implement measures enabling them to connect more new customers, while avoiding any form of discrimination or harm caused to other customers. It is also incumbent to all distribution network providers to guarantee sufficient network robustness, demanded by the significance of the distribution network as a part of the critical infrastructure and the critical information infrastructure. All this while keeping the costs at a reasonable level, justifiable to shareholders and acceptable for customers.

PREdi's long-term strategy is to increase distribution efficiency by taking operational-technical and investment measures in the network as well as by optimising processes within the company and with external entities and state authorities including the ERÚ.

Given the fact that PREdi operates in the capital, which is the economic centre of the Czech Republic and the seat of many state institutions and its distribution network is a part of the critical infrastructure, the quality and security standards of supply set by the ERÚ are likely to be further tightened in the future. As a distribution network

operator, the company needs to guarantee, to the maximum extent possible, non-discrimination in the processes for which it bears responsibility towards all market participants, electricity traders and end-users of the network. The conditions for doing so are defined in the Equal Treatment Programme, which is available on the company website. According to the assessment of the ERÚ quality standards, PREdi has been the most reliable distribution company in the Czech Republic in recent years.

In 2019, the Czech government adopted an updated version of the National Smart Grid Action Plan. PREdi's strategy, adopted in 2015 by its shareholder PRE, contains several measures, that are linked to the government strategy and gradually implemented by the company. These include smartening of MV/LV distribution stations or the development of optical infrastructure. The strategy aims to ensure that PREdi's distribution system is prepared for the introduction and greater penetration of new trends seen abroad, such as decentralised electricity sources, electromobility, accumulation, AMM, the development of energy services, etc. PREdi devotes great attention to new trends and developments in the introduction of modern solutions. In the development of smart grids, PREdi is assisted by its 100% subsidiary PREnetcom, which focuses primarily on the development and operation of metallic cables and especially on the development of optical cables that are installed together with the distribution network to achieve monitoring, management and operation control of smart grids. PREdi also cooperates with the Prague City Council on the Smart Prague strategy aimed at implementing the world-known Smart Cities concept.

In the following years, a major portion of investment will be made in the development of the 22 kV and 1 kV networks, which are expected to see an increase in the number of connected decentralised sources and the introduction of new network management and operation technologies. The only way to maintain the high reliability and security of the networks is a right combination of strengthening the system with modern technologies, interconnecting the modernised networks and introducing communication with dispatcher control centres. Good communication with the lower levels of the distribution network will enable better monitoring, measuring and managing of the network, which will have a positive effect on asset utilisation and reliability indicators. The transfer of the investments to lower voltage levels will be offset by slowing down the renovation of some parts of the backbone HV networks and by postponing the construction of some new strategic distribution stations until it is really necessary to provide or strengthen supply to the particular area.

Close cooperation with the transmission system operator, ČEPS, a.s., remains an important part of PREdi's strategy, ensuring both adequate input for the development of the supply territory as well as the high reliability of the electricity supply to end-customers. The network's reliability will be further enhanced when the new nodal point of the 400/110 kV system is built at the existing 110/22 kV Sever transformer station. It is expected to start operating in 2025. Closer cooperation between distribution and transmission systems is also required by new EU network codes. We can therefore expect greater information flows between the respective operators regarding the condition of the electricity system.

PREdi will have to tackle all these issues and continue to offer reliable and high-quality electricity distribution in accordance with the parameters set by ERÚ legislation, as non-compliance is penalised.

PREdi wants to remain a stable and prosperous energy company, a reliable electricity distributor for its customers and a partner in solving their problems with electricity distribution to their consumption points. It also wants to continue to play a key role in achieving the objectives of its shareholder, company PRE, and remain a source of security and a trusted social partner to its loyal employees.

Main strategic constructions in 2020

Main strategic investments will be made in construction and modernisation of 110/22 kV transformer stations and 110 kV overhead lines and cables lines in the PREdi's supply territory. Individual projects will be carried out in line with PREdi's long-term strategy of distribution network development. All construction in Prague has been duly coordinated with the planning and construction departments of Prague City Council and respects the urban plan.

In view of admissibility and complexity of construction, the main strategic constructions for 2020 and following years include:

- the continued construction of the cable tunnel between the new Karlín transformer station and the Hlávka bridge;
- the continued construction of a new cable tunnel Invalidovna I;
- the continued reconstruction of the Pražačka transformer station:
- the launch of the installation of the 110 kV overhead lines between the Malešice, Zahradní Město and Jih transformer stations;
- the repairs and dismantling of 110 kV overhead lines between the Sever and Východ transformer stations, especially in the parts of Prague 9, the Prosek housing estate;
- the launch of the construction of the Slivenec transformer station; and,
- the launch of preparation works for the renovation of the Jih transformer station.

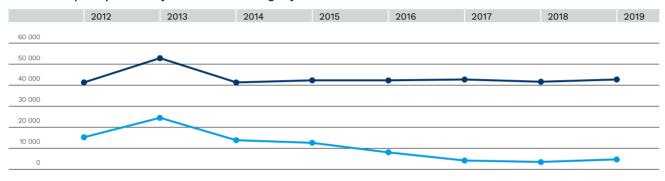

014 Subsidy schemes

The PRE Group participates in nationwide development projects and in line with the legal requirements it draws subsidies from relevant projects, especially in the fields of e-mobility and electricity network management. This includes, namely, the state-funded project "Improvement of the region's resistance to risk of blackout using new technologies and crisis management procedures" No. VI20192022124 of the Central register of projects (Centrální evidence projektů). The project is provided by the Ministry of Interior of the Czech Republic under the Security Research Programme of the Czech Republic realised in the years 2015–2022 (BV III/1 – VS). It was inaugurated on 1 July 2019 and it is due to expire on 30 June 2022.

Allocation of investments in 2015-2019 (MCZK including capitalisation)

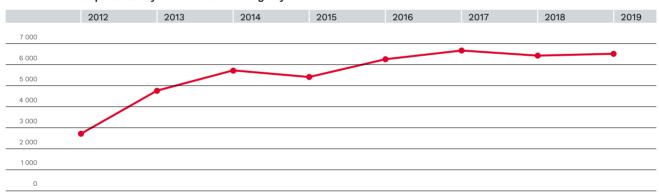

| | Total | Distribution | Distribution | Distribution | Electricity |
|------|-------------|--------------|--------------|--------------|-------------|
| | investments | HV equipment | MV equipment | LV equipment | meters |
| 2015 | 1,494.1 | 227.1 | 845.2 | 311.9 | 109.9 |
| 2016 | 1,583.8 | 329.8 | 815.8 | 328.2 | 110.0 |
| 2017 | 1,594.2 | 319.9 | 686.3 | 459.5 | 128.5 |
| 2018 | 1,700.5 | 217.0 | 862.3 | 459.2 | 162.0 |

Trends in the electricity sector

2019 was the fourth year of the fourth regulatory period.

The three-year long fourth regulatory period (1.1.2016–31.12.2018) has been extended until 31 December 2020. It continues to follow the main principles established in the previous period and reflects the latest changes in the energy legislation of the Czech Republic and the European Union. Its main aim is to prepare objective inputs for the fifth regulatory period. According to the Energy Regulatory Office's plans, the fifth regulatory period will last five years starting in 2021.

Overview of relevant legislation

Act published in 2019

Act No. 277/2019 Coll., from 15 October 2019, which introduces amendments to several laws due to the adoption of the Act on the Journal of Laws and International Treaties (Section 33 provides for the changes in the Energy Act) was published on 6 November 2019 and it will become effective on 1 January 2022.

Decree published in 2019

Decree No. 360/2019 Coll., from 24 December 2019, which amended Decree No. 403/2015 Coll., on guarantees of origin of energy from renewable sources and electricity from highly effective combined heat and power plants, was published on 31 December 2019 and came into effect on 1 January 2020.

019

ERÚ price decisions published in 2019

ERÚ Price Decision No. 7/2018 from 20 November 2018, which set prices for related energy services and other regulated prices, came into effect on 1 January 2019. To regulate prices in this field during 2020, ERÚ Price Decision No. 5/2019 from 26 November 2019 was published on 28 November 2019.

ERÚ Price Decision No. 3/2018 from 25 September 2018, which set prices for related energy services and other regulated prices, and Price Decision No. 9/2018 from 18 December 2018, which amended Price Decision No. 3/2018, came into effect on 1 January 2019. To regulate prices in this field during 2020, ERÚ Price Decision No. 3/2019 from 26 September 2019 was published on 30 September 2019. ERÚ Price Decision No. 7/2019 from 20 December 2019, which amended Price Decision No. 3/2018, as amended by Price Decision No. 9/2018, was published on 20 December 2019. ERÚ Price Decision No. 8/2019 from 20 December 2019, which amended Price Decision No. 3/2019, was published also on 20 December 2019.

ERÚ Price Decision No. 8/2018 from 20 November 2018, which sets prices for related energy services for consumers from low voltage networks, came into effect on 1 January 2019. To regulate prices in this field during 2020, ERÚ Price Decision No. 6/2019 from 26 November 2019 was published on 28 November 2019.

Regulations of the Czech government published in 2019

Government Regulation No. 245/2019 Coll., from 16 September 2019 on the allocation of state budget funds in 2020 pursuant to Section 28 (3) of the Act on Promoted Energy Sources was published on 24 September 2019 and came into effect on 1 January 2020.

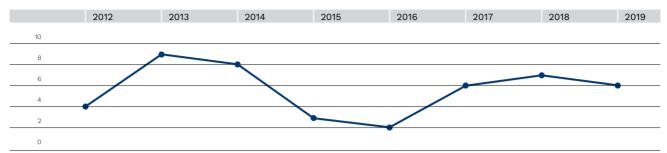

Main financial indicators (MCZK)

| | 2019 | 2018 | 2017 |
|---|--------|--------|--------|
| Total assets | 29,345 | 28,978 | 28,649 |
| Distribution equipment | 24,146 | 23,941 | 23,700 |
| Other fixed assets | 2,796 | 2,685 | 2,542 |

Maximum achieved load of the year (MW)

Report of the Board of Directors on Business Activities and Assets for 2019

In 2019, PREdistribuce, a.s., was the most reliable electricity distributor in the Czech Republic according to the ERÚ indicators. The SAIDI indicator, the leading index of electricity supply reliability, reached in 2019 its historical best; the standards of the SAIFI indicator were met in the values set and required by the ERÚ and they reached the average of the previous 5 years. The company manages to keep such a high level of reliability of electricity supply while maintaining the security of networks at all voltage levels and complying with its environmental responsibilities. At the same time, it ensures a high level of occupational safety and promotes the development and further training of its employees.

Financial report

Financially, 2019 can be considered a successful year for PREdistribuce, a.s. The company's profit increased by CZK 14 million year-on-year, amounting to CZK 1,443 million. Despite the impact of climatic conditions, which resulted in a decrease in the volume of distributed electricity by 31 GWh and lower sales of distribution services, this result is a success. Accordingly, EBITDA increased by CZK 17 million year-on-year.

In 2019, PREdi distributed in total 6,296 GWh, which is above its long-term average.

The company's operating profit increased by CZK 21 million year-on-year. The most important operating revenue item is the revenue from distribution services; the most important operating expense item is the cost of transit and distribution services.

In 2019, PREdi purchased services for the total of CZK 1,468 million, which was CZK 20 million fewer than in 2018. This decrease is due to a decline in the financial value of repair of distribution assets.

The company's total personnel expenses decreased by CZK 10 million year-on-year due to a decrease in the number of employees.

This appropriation (the adjustment of operating assets value) consists of depreciated assets of the company and allowances for impairment of receivables. Its value decreased year-on-year owing to the lower number of allowances combined with the lower value of depreciated fixed assets. The latter is due to additional depreciation of assets with high purchase value and a short period of depreciation.

Other operating revenues increased by CZK 15 million year-on-year owing to higher revenues from sales of PREdi's assets to other PRE Group companies. This strategy was chosen in order to optimise activities and implement the relocation project of 22 kV cables and communication cables in Prague's Bořislavka area. This project led to higher operating costs.

The total amount of other operating costs decreased due to the reversal of provisions that are not expected to be used.

The company's financial expenses (especially interest) increased by CZK 13 million year-on-year, which affected the financial results.

PREdi's total assets increased year-on-year by CZK 367 million, reaching CZK 29,345 million. The increase in total assets was particularly driven by the growth in tangible fixed assets following company's investments. In 2019, PREdi invested CZK 1,643 million (including capitalisation) in the development and renovation of the distribution equipment. The amount of investments corresponds to the company's long-term plan of development and renovation of assets.

The increase in the value of both equity and liabilities increased (CZK 19,700 million) reflects the year-on-year increase in the company's profit and the increase in the appropriation of undistributed profits from previous years. The liabilities increased year-on-year by CZK 303 million mainly due to the increase in short-term liabilities towards other PRE Group companies. In 2019, 67.1% of the company's funding came from equity, 26.1% from liabilities and 6.8% from other liabilities.

The company achieved the operating cash flow of CZK 2,416 million, which was used, together with the proceeds from investment contributions, to finance the investment programme and to pay out dividends and directors' fees (amounting to CZK 1,411 million).

Investments

Every year, in order to maintain reliable and safe networks PREdistribuce, a.s., develops and implements long-term, medium-term and one-year investment plans. The plans are submitted to the bodies of the company for approval and are also subject to control by the regulator, ERÚ, which monitors if distributors duly plan and carry out network renovation in view of write-offs and if their networks are developed based on end customers' legitimate demands for new connections and increasing input. To ensure the required operational reliability and high quality of distribution and related services expected by customers in the licensed territory, the company needs to be able to carry out adequate modernisation and development of equipment as well as planned repairs. Non-compliance with the guaranteed legally mandated standards is financially penalised in accordance with ERÚ Decree
No. 540/2005 Coll., as amended. According to the assessment of the ERÚ quality standards, PREdi has been the most reliable distribution company in the Czech Republic in recent years.

The individual investment plans draw on the analyses of the network's technical condition, the load development in the supply areas, transmission ability and actual operation reliability, the real physical lifetime of individual network components and the possibilities of their effective maintenance.

One of the key elements of PREdi's investment programme is strategic investments, primarily in the construction and modernisation of 110/22 kV transformer points and their systemic connection by 110 kV overhead and cable lines.

Strategic investments

Following the one-year investment plan approved by PREdi's only shareholder PRE, PREdi continued in 2019 with the necessary and carefully planned renovation and modernisation of the existing 110 kV and 22 kV networks and equipment which is part of the city's critical infrastructure. Since its failure could cause supply disruptions across a large territory and the collapse of transport and the city's operation, especially in transport, it is incumbent to

PREdi to maintain the backbone 110 kV networks in safe and operable state. All construction in Prague has been duly coordinated with the planning and construction departments of Prague City Council and respects the urban plan. This cooperation ensures the most favourable living and business conditions in the capital.

The most significant strategic constructions in 2019 included:

- the preparation of the installation of the 110 kV overhead lines between the Malešice, Zahradní Město and Jih transformer stations;
- the continued construction of the cable tunnel between the new Karlín transformer station and the Hlávka bridge;
- the launch of the construction of a new cable tunnel Invalidovna I; and,
- the continued reconstruction of the Pražačka transformer station.

Aside from the main listed strategic constructions in the backbone 110 kV networks and the 110/22 kV transformer stations, the company also continues with the renovation of 22/0.4 kV switching and distribution stations and MV and LV cable lines. As in previous years, the systematic renovation of the 1 kV low voltage networks continued, including the renovation of construction and technological parts of distribution transformer stations.

In line with new trends in the energy sector, the implementation of smart grids and its new 2015 investment strategy adopted by its only shareholder PRE, PREdi also works intensively on responding to new energy sector trends and on preparing its networks and equipment for the gradual implementation of smart grids including intelligent AMM metering. The company also focuses on the development of electromobility, accumulation and related services, which are relevant for distribution networks in an urban agglomeration.

In 2019, several dozens 22/0.4 kV distribution stations were smartened. In the development of optical infrastructure, PREdi is assisted by its 100% subsidiary PREnetcom, which focuses primarily on the use and operation of metallic cables and especially on the development of optical cables that are installed together with the distribution network. The implementation of smart technologies will enable PREdi to control, monitor and measure the network and transfer data remotely, ensuring the high reliability of the network. Foreign studies show that the right combination of strengthening the distribution system and implementing new technologies can satisfy a significant portion of demands on the distribution network ensuing from the integration of decentralised generation, charging stations for electric vehicles, the connection of accumulation capacities, the implementation AMM and other elements.

In the forthcoming period, PREdi's main objective is to continue fulfilling the tasks of a distributor in terms of network renovation and adequate development in order to timely modernise the distribution system equipment in Prague which is nearing the end of its physical and accounting lifetime, thus ensuring a high level of reliability and security of the networks. While pursuing its objectives, the company acts with the greatest possible consideration for the environment.

Human resources

Human resources management

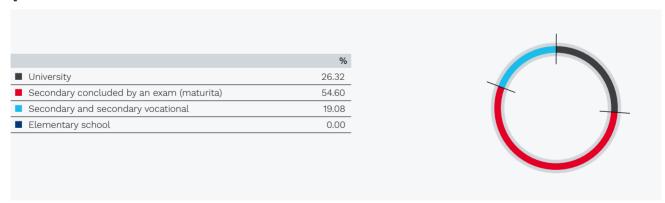

All personnel administration and services for PREdi are carried out by the parent company PRE. It includes mainly all personnel administration and wage calculations using the SAP HR module. Both tariff and negotiated wages are used in PREdi and their specific applications are governed by the respective company standards. Services related to occupational safety, fire safety and environmental protection are also provided centrally by the parent company in close cooperation with PREdi.

Training

PREdi considers the systematic and targeted training and development of its employees to be a key tool of its strategic HR management. All services are provided to the PREdi employees by the HR department of the parent company, PRE, which coordinates and carries out all courses, training and development initiatives for both the employees and managements. All activities of development and training are realised in line with a yearly development plan. The document accounts for the needs of PREdi to provide its employees with required expert knowledge, qualifications and competences, as well as managerial skills.

028

Oualification structure

PREdi is a significant player in the distribution market and as such it strives to maintain a high level of employee expertise. Additional professional training is key for the majority of working positions. This mainly entails gaining and maintaining the qualification mandated by Decree No. 50/1978 Coll., informing on the updates in the Energy and Construction Acts, as well as further basic training and checking of knowledge necessary for all related activities in the company.

PREdi supports selected employees in acquiring further qualification by studying at secondary vocational schools and universities, particularly in the field of electrical engineering. As a result, it succeeds in acquiring a high level of expertise of all employees and created balance across all positions. By increasing the qualification of its employees, PREdi becomes more competitive in relation to other distribution companies and more attractive in relation to new job candidates in this field.

PREdi has also enjoyed a long-term cooperation with secondary schools and universities, offering unpaid professional internships at its workplaces to electrical engineering students in their final year. The current lack of skilled workers in the relevant technical fields attests to the importance and usefulness of these activities. In cooperation with PRE's HR department, PREdi tries to recruit new people for the positions of independent development and operation management technicians, mostly among graduates of the Faculty of Electrical Engineering of the Czech Technical University in Prague (FEL ČVUT) and of electrical engineering secondary vocational schools, such as the František Křižík Secondary Vocational School and College of Electrical Engineering (VOŠ a SPŠE Františka Křižíka). In 2019, PREdi continued to provide electrical engineering graduates with specific

029

Age structure

| | % |

| Over 60 years | 8.99 |

work placements as part of the recruitment programme. It aims to enable graduates to complement their theoretical knowledge with practical experience and to facilitate the smooth transfer of knowledge and experience related to distribution networks from employees who are about to retire to new employees who will succeed them.

Social policy

In PREdi, social policy is traditionally considered an important motivational and stabilisation tool and it is a cornerstone of its values. Key principles of the social policy are enshrined in the collective agreement and attest to a long-standing commitment to provide a robust social care programme including both blanket and elective fringe benefits. The programme primarily aims at the improvement of the employees' social conditions, working environment and catering, the provision of interest-free social loans and housing loans, legally mandated occupational healthcare and additional preventive healthcare programmes, the organisation of cultural and sporting events for employees as well as the promotion of free-time activities for employees and their families. The scope and quality of the social policy meet a high standard of employee care, which the company aims to improve every year.

Healthcare

030

Occupational healthcare is provided at the company's premises by a medical professional from POLIKLINIKA AGEL Praha Italská, a healthcare facility operated by the contractual partner. This legally mandated healthcare mostly includes routine, pre-employment, special and in some cases post-employment check-ups. In addition to the legal requirements, all employees have access to free preventive healthcare programmes: most notably, breast cancer screening and treatment, urological and thyroid screening, regular vaccinations against seasonal diseases, type 1 diabetes as well as extra dental care. Newly in 2019 employees can also enjoy the services of massages in two places at the premises of the PRE Group. Managers of the company are also provided with a preventive healthcare programme at the Na Homolce Hospital and Pavel Kolář's Centre for Musculoskeletal Medicine.

Environmental protection and OHS

In line with the PRE Group policy on environmental protection, safety and energy efficiency, PREdi promotes a responsible attitude to the protection of the environment and public health. PREdi actively seeks to meet the legal requirements and put them into practice.

In order to reduce the environmental impact of their activities, the companies take measures to limit the consumption of non-renewable sources of energy as well as to protect soil and water. In order to protect water and soil, 110/22 kV transformers are renovated and older 22/0.4 kV oil transformers are replaced by new transformers in order to minimise the risk of release of pollutants. PREdi saw its environmental management systems re-certified according to CSN (Czech standardisation norm) EN ISO 14001:2016.

PREdi considers occupational health and safety of its employees and take preventive measure in order to minimise adverse health effects of their work activity. Employees are trained for work at height to prevent any accidents and they are also regularly provided with necessary protective tools for work with electrical devices. PREdi keep its employees and stakeholders informed about security issues and are open to their employees' suggestions. The company traditionally supports health promotion programmes, which is one of the reasons why work-related accidents are kept at low levels.

032

Risk management system

Risk management in PREdi draws on a common methodical framework shared by all the companies of the PRE Group.

The main objective of the risk management system is to increase the value of the company while undertaking only acceptable risks. It also ensures timely warnings and serves to assess the effectiveness of risk management tools and measures. The main focus are the risks that could present the biggest threat given the assessment of their potential impact. New risks are constantly identified. All risks are recorded in a list of risks.

The monitored risks are assessed in terms of their potential impact and likelihood using three scenarios of possible development. The process of risk management includes the identification and assessment of risks and the definition and specification of controls and other measures aimed at mitigating risks and reporting specific risks. Risks are systematically monitored in the following categories specified in a map of risks: strategic risks, financial risks, operational risks and compliance risks.

Legislative-regulatory risks have the most profound impact on the company's activities. These risks are closely linked to key regulatory parameters and other regulations applicable in the upcoming fifth regulatory period (2021-2025). Depending on their nature, operational risks are usually managed in a decentralised way by individual organisational units; the most significant operational risks and their management are assessed by internal audits.

The key body of the risk management system is the Risk Management Committee, which regularly debates summary risk management reports and formulates management strategies for the most important risks in view of the company's risk exposures. The committee continuously evaluates the total possible impact of risks on the company's economic results.

The risk management system and its methodology are based on the methods and procedures of the EnBW corporate group. The monitored risks are reported at regular intervals using a unified structure stipulated by the risk management standards of the EnBW corporate group.

Report on General Meetings

In 2019, five General Meetings were held (in the form of resolutions issued by the parent company as the sole shareholder).

General Meeting held on 28 March

Agenda:

- the assessment of the objectives set by the Board of Directors' executive members for 2018; and,
- the payment of the variable yearly bonus to the Board of Directors' executive members.

General Meeting held on 25 April

Agenda:

- the Report of the Board of Directors on Business Activities and Assets for 2018;
- the Supervisory Board Report;
- the separate financial statements for 2018, the proposal for the distribution of 2018 profit, including the determination of the amount of dividends and director's fees and the method of payment;
- the company's business concept for 2019;
- the Report on Relations for 2018; and,
- the 2018 Annual Report.

General Meeting held on 25 July

Agenda:

- the removal of Jindřich Broukal as member of the Board of Directors as of 25.7.2019;
- the election of Jan Sixta as member of the Board of Directors as of 26.7.2019; and,
- the approval of an advance payment of the variable yearly bonus to the Board of Directors' executive members.

General Meeting held on 29 October

Agenda:

■ the election of Alexander Manfred Sloboda as member of the Supervisory Board for another term as of 3.1.2020.

General Meeting held on 19 December

Agenda:

■ the approval of the management's objectives for 2020.

Information required by law

Information about facts which occurred after the balance sheet day and are significant for the fulfilment of the purpose of the present report

No such facts have occurred, except for the events mentioned in note 20 in the financial statements.

Information about the projected developments in the accounting unit's activities

The information is presented in the chapter "Company strategy" and "Report of the Board of Directors on Business Activities and Assets for 2019".

Information about activities in research and development

The company does not systematically conduct activities in these fields.

Information about acquisition of own shares

In 2019 the company did not acquire its own shares. Since 1 January 2018, the company has been a 100% shareholder in PREnetcom, a.s.

Information about activities in the field of environmental protection and labour law relations

The information is presented in the chapters "Environmental protection and OHS" and "Human resources".

Information about whether the accounting unit has an organisation unit abroad

The company has no branch and no organisational unit abroad.

Information about risk management objectives and methods in the company

The information is presented in the chapter "Risk management system".

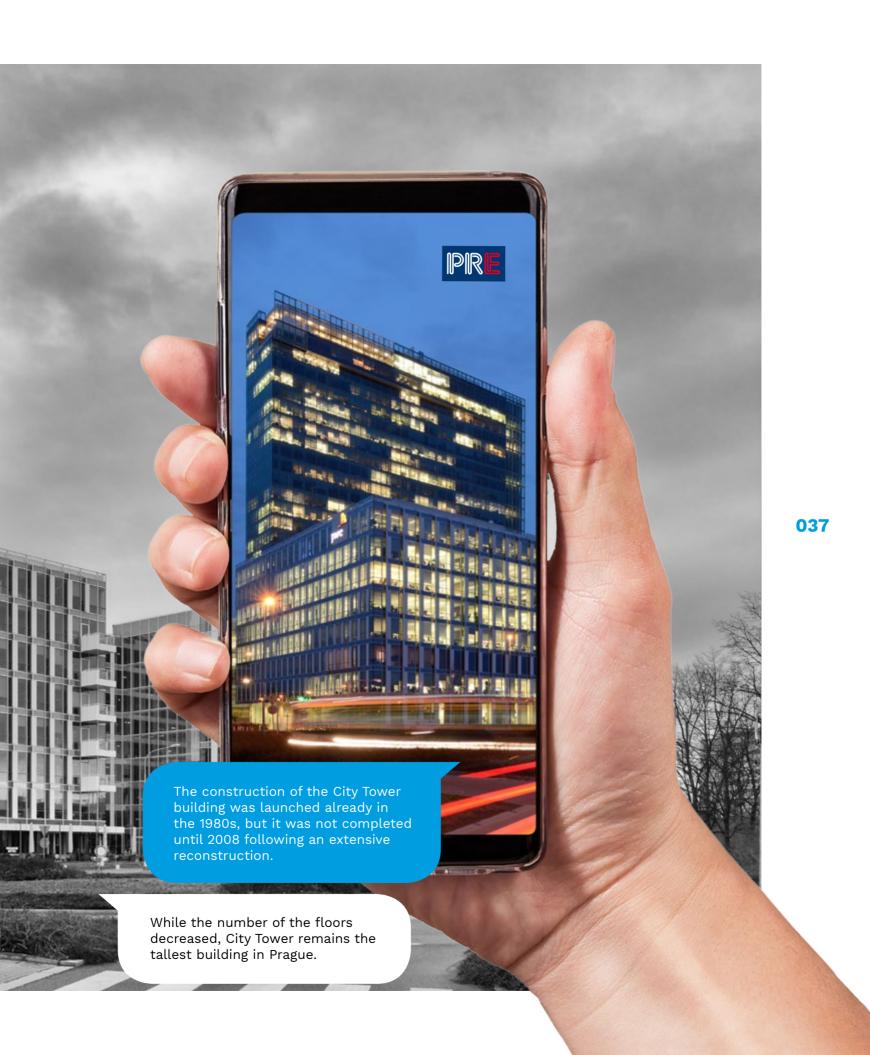

Information about price, credit, liquidity and cash flow risks the accounting unit is exposed to

The information is presented in the financial statements.

Information about interruption of business

The company did not interrupt its business during the year.

Report on Relations of PREdistribuce, a.s., for 2019

(Hereinafter the Report on Relations) drawn up in accordance with Section 82 of Act No. 90/2012 Coll., on Business Corporations and Cooperatives (hereinafter the Business Corporations Act) for the accounting period of 1.1.2019 to 31.12.2019. The relations are described in a manner respecting the provisions of Section 504 of Act No. 89/2012 Coll., the Civil Code, concerning trade secrets, and by analogy with the provisions of Section 359 of the Business Corporations Act concerning restrictions of information provision.

1. Structure of the relations between the controlled entity and the controlling entity, the role of the controlled entity and the manner and means of control

Controlling entity (managing entity): **Pražská energetika, a.s.,** registered office Na Hroudě 1492/4, Prague 10, 100 05, ID No.: 60193913, registered with the Municipal Court in Prague, file ref. B 2405 **(PRE)**.

Controlled entity (managed entity): **PREdistribuce, a.s.,** registered office Svornosti 3199/19a, Prague 5, 150 00, ID No.: 27376516, registered with the Municipal Court in Prague, file ref. B 10158 **(PREdi)**.

The companies PREdistribuce, a.s., PREměření, a.s., eYello CZ, k.s., KORMAK Praha a.s., PREservisní, s.r.o., PREzákaznická, a.s., and VOLTCOM spol. s r.o. (since 30.4.2019), as managed entities, and Pražská energetika, a.s., as the managing entity, jointly constitute a corporate group, also referred to as the PRE Group. The PRE Group also includes the 100% subsidiary of PREdi, PREnetcom, a.s., and the 100% subsidiaries of PREměření, a.s.: PRE FVE Světlík, s.r.o., SOLARINVEST – GREEN ENERGY, s.r.o., FRONTIER TECHNOLOGIES, s.r.o., a WINDING WE NORTH a.s. (since 19.12.2019), which is also the managing entity of the subsidiary PRE VTE Částkov, s.r.o. (since 19.12.2019).

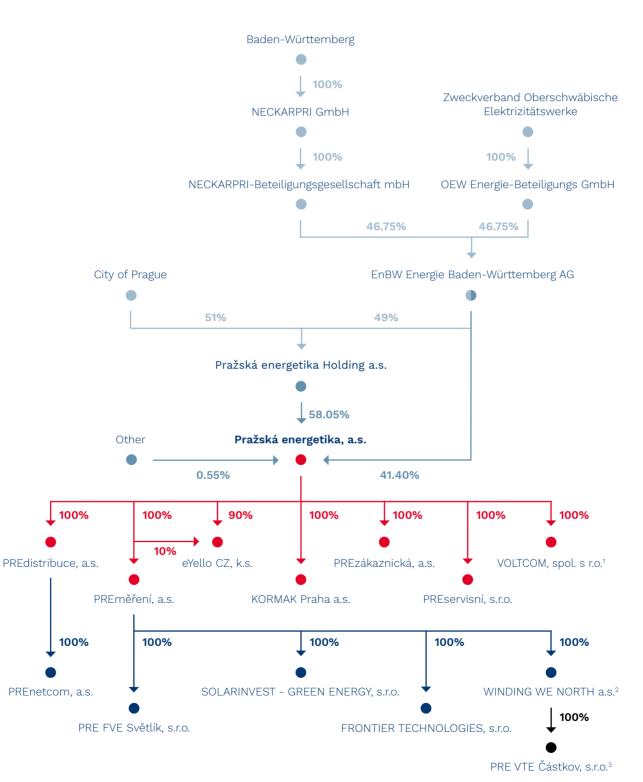

PREdi is a 100% subsidiary of PRE. PRE elects and removes members of the Board of Directors and the Supervisory Board of PREdi. PRE defines the strategic management of the PRE Group and also makes decisions about PREdi's business concept, including the rules of remuneration and the principles of collective bargaining. PRE formulates, assesses and supervises the objectives of the executive management of PREdi. PRE also gives PREdi's Board of Directors strategic instructions and defines strategic principles. PREdi follows the internal group guidelines of PRE. PREdi is a part of the consolidated PRE Group. The above described management of PREdi by PRE is carried out within the scope defined by applicable law, especially Section 25a of Act No. 458/2000 Coll., the Energy Act. The role of PREdi within the PRE corporate group is to be a stable and reliable operator of the distribution system in the capital and in the city of Roztoky. PREdi meets the requirements and expectations of the distribution network users by using state-of-the-art technologies and procedures.

PREdi is at the same time the controlling entity of its 100% subsidiary PREnetcom, a.s., and, as such, PREdi elects and removes members of the Board of Directors and Supervisory Board of PREnetcom, a.s., approves its business concept, gives strategic instructions to its Board of Directors, and supervises the Board of Directors' activities.

Other entities controlled/managed by PRE as the controlling/managing entity:

- PREměření, a.s., registered office Na Hroudě 2149/19, Prague 10, 100 05, ID No.: 25677063, registered with the Municipal Court in Prague, file ref. B 5433 (PREm);
- PREzákaznická, a.s., registered office Na Hroudě 1492/4, Prague 10, 100 05, ID No.: 06532438, registered with the Municipal Court in Prague, file ref. B 22870 (PREzak);
- **eYello CZ, k.s.,** registered office Kubánské náměstí 1391/11, Prague 10, 100 00, ID No.: 25054040, registered with the Municipal Court in Prague, file ref. A 76596 **(eYello)**;
- KORMAK Praha a.s., registered office K Sokolovně 667, Prague 10, 104 00, ID No.: 48592307, registered with the Municipal Court in Prague, file ref. B 20181 (KORMAK Praha);

Contract on work on the implemented investment No. IS/S24/1947641 - in effect from 28.11.2019 to 30.4.2020

4. Review of whether damage has been incurred by the controlled entity and a review of its settlement

PREdi has not incurred any damages from the relation with the controlling entity or the entities controlled by the managing entity or from the above-mentioned contractual relationships. Transactions arising from the above-mentioned contractual relationships are agreed in prices usual at the place and time; no preferential treatment was provided to one party or the other.

5. Advantages and disadvantages arising from the relations between the controlled entity and the controlling entity and between the controlled entity and the entities controlled by the controlling entity, and the risks that arise from them; information on the potential settlement of damage. Information on the possible settlement of damage

PREdi has not incurred any damage or faced any risks beyond the degree usual in business relations between independent entities resulting from the relation with the managing entity or the entities controlled by the managing entity, or from the above-mentioned contractual relationships.

Cooperation between PREdi and PRE and the companies of the PRE Group brought considerable advantages to PREdi thanks to the acquired know-how. Owing to its affiliation with the corporate group, PREdi has, in particular, access to the corporate group's knowledge and experience, as well as to the technology used, the real estate and all the advantages and synergies it brings.

The Board of Directors, as the statutory body of PREdi, declares that the data contained in this Report on Relations is correct and complete and that the procedure of drawing up the Report on Relations according to Section 82 et seq. of the Business Corporations Act made full use of all the information and data which the statutory body has at its disposal and which it has ascertained acting with due diligence.

Supervisory Board Report on Activities in 2019

In accordance with the Articles of Association, the Supervisory Board consists of four members. As a supervisory body, it oversees the performance of the company's business activities in compliance with the law and the Articles of Association.

In 2019, four meetings of the Supervisory Board were held. They were regularly attended by the chairperson and the vice-chairperson of the Board of Directors.

The Supervisory Board continuously monitored the company's activities and the key decisions of the Board of Directors. The Board of Directors regularly informed the Supervisory Board about the current developments in the company, its economic results, the implementation of the investment plan, and the company's financial situation. To this end, the Board of Directors submitted written materials and its members commented on them when they were debated by the Supervisory Board.

In 2019, the Supervisory Board, amongst others:

- debated and reviewed the Report on Relations for 2018 and did not identify any irregularities with regard to the requirements of the Act on Business Corporations, including the review of whether any damage was incurred and settled in accordance with Sections 71 and 72:
- debated the Report of the Board of Directors on Business Activities and Assets for 2018;
- debated and reviewed the separate financial statements for 2018 and acquainted itself with the auditor's report on the separate financial statements;
- reviewed the proposal for the distribution of 2018 profit, including determination of the amount of profit shares (dividends) and directors' fees for 2018 and the method of payment; it recommended its adoption by the General meeting;
- debated the 2018 Annual Report;
- debated the materials to be debated by the General Meeting of the company convened on 25 April 2019;
- debated and approved the fulfilment of the top management's objectives for 2018;
- debated the top management's objectives for 2020;
- debated and approved an investment project involving the enhancement of a 22 kV network Radlice G-120331;
- debated and approved an investment project involving the project of Zahradní Město transformer station
 110 kV distribution station and control system; and,
- debated the economic plan for 2020 and the draft plan for 2021-2022.

The Supervisory Board declares that the company's economic results in 2019 were very good and expresses its thanks for them to the members of the Board of Directors as well as the company's employees.

This document is an unsigned English translation of the Czech auditor's report. Only the Czech version of the report is legally binding.

Independent Auditor's Report to the Shareholder of PREdistribuce, a.s.

Report on the Audit of the Financial Statements

Opinion

We have audited the accompanying financial statements of PREdistribuce, a.s. ("the Company"), prepared in accordance with Czech accounting legislation, which comprise the balance sheet as at 31 December 2019, and the income statement, the statement of changes in equity and the cash flow statement for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory notes. Information about the Company is set out in Note "General information" to the financial statements.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company as at 31 December 2019, and of its financial performance and its cash flows for the year then ended in accordance with Czech accounting legislation.

Basis for Opinion

We conducted our audit in accordance with the Act on Auditors and Auditing Standards of the Chamber of Auditors of the Czech Republic, consisting of International Standards on Auditing (ISAs) as amended by relevant application guidelines. Our responsibilities under those regulations are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Act on Auditors and the Code of Ethics adopted by the Chamber of Auditors of the Czech Republic, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

046

KPMG Česká republika Audit, s.r.o., a Czech limited liability company and a member firm of the KPMG network of independent member firms affiliated with KPMG International Cooperative ("KPMG International"), a Swiss entity.

Recorded in the Commercial Register kept by the Municipal VAT No. CZ699001996 Court in Prague, Section C, Insert No. 24185

Identification No. 49619187 ID data box: 8h3gtra

Other Information

In accordance with Section 2(b) of the Act on Auditors, other information is defined as information included in the annual report other than the financial statements and our auditor's report. The statutory body is responsible for the other information.

Our opinion on the financial statements does not cover the other information. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. In addition, we assess whether the other information has been prepared, in all material respects, in accordance with applicable laws and regulations, in particular, whether the other information complies with laws and regulations in terms of formal requirements and the procedure for preparing the other information in the context of materiality, i.e. whether any non-compliance with those requirements could influence judgments made on the basis of the other information.

Based on the procedures performed, to the extent we are able to assess it, we report that:

- the other information describing matters that are also presented in the financial statements is, in all material respects, consistent with the financial statements; and
- the other information has been prepared in accordance with applicable laws and regulations.

In addition, our responsibility is to report, based on the knowledge and understanding of the Company obtained in the audit, on whether the other information contains any material misstatement. Based on the procedures we have performed on the other information obtained, we have not identified any material misstatement.

Responsibilities of the Statutory Body Supervisory Board for the Financial Statements

The statutory body is responsible for the preparation and fair presentation of the financial statements in accordance with Czech accounting legislation and for such internal control as the statutory body determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the statutory body is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the statutory body either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Supervisory Board is responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the above regulations will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the above regulations, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the statutory body.
- Conclude on the appropriateness of the statutory body's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on relations

We have reviewed the factual accuracy of the information disclosed in the report on relations of PREdistribuce, a.s. ("the Company") for the year ended 31 December 2019. The responsibility for the preparation and factual accuracy on this report rests with the Company's statutory body. Our responsibility is to express our view on the report on relations based on our review.

We conducted our review in accordance with Auditing Standard No. 56 of the Chamber of Auditors of the Czech Republic. This standard requires that we plan and perform the review to obtain limited assurance as to whether the report on relations is free of material misstatement. A review is limited primarily to inquiries of the Company's personnel and analytical procedures and examination, on a test basis, of the factual accuracy of information, and this provided less assurance than an audit. We have not performed an audit of the report on relations and, accordingly, we do not express an audit opinion.

Based on out review, nothing has come to our attention that would lead us to believe that the report on relations of PREdistribuce, a.s. for the year ended 31 December 2019 contains material factual misstatements.

Statutory Auditor Responsible for the Engagement

Petr Kuna is the statutory auditor responsible for the audit of the financial statements of PREdistribuce, a.s. as at 31 December 2019, based on which this independent auditor's report has been prepared.

General information

Establishment and description of the Company

PREdistribuce, a.s., ("PREdi" or the "Company") was established as a joint-stock company on 16 August 2005 and was entered in the Commercial Register of the Municipal Court in Prague on 7 September 2005.

The Company's registered office is located at Svornosti 3199/19a, Prague 5, 150 00, ID No.: 27376516.

The Company's principal activities include the distribution of electricity in the capital Prague, in Roztoky and in Žalov, covering an area of 505 km², from which it derives most of its revenues. The distribution of electricity is carried out in the public interest and the associated rights and obligations, with the exception of general legal regulations, are governed by Act No. 458/2000 Coll., the Energy Act, as amended, and the related implementation guidance.

Statutory and supervisory bodies as at 31 December 2019

| Milan Hampl | Chairperson of the Board of Directors |
|----------------|--|
| Petr Dražil | Vice-chairperson of the Board of Directors |
| Tobias Mirbach | Member of the Board of Directors |
| Jan Sixta | Member of the Board of Directors |

| Pavel Elis Chairperson of the Supe | |
|------------------------------------|---------------------------------|
| Alexander Manfred Sloboda | Member of the Supervisory Board |
| Karsten Krämer | Member of the Supervisory Board |
| Zdeněk Smetana | Member of the Supervisory Board |

The Company's sole shareholder is Pražská energetika, a.s., with its registered office at Na Hroudě 1492/4, Prague 10, 100 05.

Organisational structure of the Company

The Company has two divisions, the Managing Director's division and the Regulated Assets division. The Managing Director's division is further organised into four sections including Network Management, Preparation of Constructions, Network Access and Economics, and Network Concepts. The Regulated Assets division is organised into Network Administration and Network Operation.

The PRE Group

In 2019, the PRE Group consisted of the parent company, Pražská energetika, a.s., which is the holder of licences for trading in electricity and gas in the Czech Republic, and its subsidiaries. These include the Company, PREměření, a.s., eYello CZ, k.s., KORMAK Praha a.s., PREservisní, s.r.o., PREzákaznická, a.s. Since 30 April 2019, VOLTCOM, spol. s r.o., has been a new member of the PRE Group. The following 100% subsidiaries of PREměření, a.s., also form part of the PRE Group: PRE FVE Světlík, s.r.o., SOLARINVEST – GREEN ENERGY, s.r.o., FRONTIER TECHNOLOGIES, s.r.o., since 19 December 2019 also WINDING WE NORTH a.s., and its 100% subsidiary PRE VTE Částkov, s.r.o. PREnetcom, a.s., which is a 100% subsidiary of the Company also forms part of the PRE Group.

Pražská energetika, a.s., prepares the consolidated financial statements, which include the financial statements of the Company and its subsidiaries. The consolidated financial statements form a part of the Annual Report, which is available in the Collection of Deeds of the parent company. These consolidated financial statements represent the financial statements of the narrowest group of entities.

The consolidated financial statements of the widest group of entities to which the Company as a consolidated entity belongs are prepared by EnBW Energie Baden-Württemberg AG, with its registered office at Durlacher Allee 93, 76131 Karlsruhe, Germany. These consolidated financial statements are available at the consolidating entity's registered office.

Accounting principles

Statement of compliance

The financial statements were prepared in accordance with Act No. 563/1991 Coll., the Accounting Act, as amended; Regulation No. 500/2002 Coll., which provides implementation guidance on certain provisions of the Accounting Act for reporting entities that are businesses maintaining double-entry accounting records, as amended; and the Czech Accounting Standards for Businesses, as amended.

Basis for the preparation of the financial statements

These financial statements are presented in thousands of Czech crowns (TCZK) and millions of Czech crowns (MCZK). The accounting records are maintained in compliance with general accounting principles, specifically the historical cost valuation basis, the accruals principle, the prudence concept and the going concern assumption.

Foreign currency translation

During the year, assets and liabilities denominated in a foreign currency are translated using the daily foreign exchange rate announced by the Czech National Bank. During the year, foreign exchange gains and losses are only recognised when realised. At the balance sheet date, foreign currency assets and liabilities are translated at the Czech National Bank's official rates for that date. Unrealised foreign exchange gains and losses are recognised in the income statement.

Tangible and intangible fixed assets

Assets owned by the Company

Purchased tangible and intangible fixed assets are stated at acquisition cost, which includes the purchase price and costs related to the acquisition. Tangible and intangible fixed assets costing more than TCZK 40 and TCZK 60, respectively, with a useful life exceeding one year are recognised in the balance sheet. Acquisition cost does not include investment contributions (see below). The Company used the possibility of capitalising interest in line with Section 47 of Regulation No. 500/2002 Coll., as amended.

Assets acquired through the contribution to the Company and assets that were used by other entities before the acquisition by the Company are valued based on an expert appraisal. As of the acquisition date of these assets, the Company recognises the acquisition cost and wear and tear resulting from the use of the acquired assets by prior entities.

The cost of internally produced tangible and intangible assets includes direct and indirect costs related to the production of the asset.

Tangible assets costing between TCZK 2 and TCZK 40 with an individual useful life exceeding one year are classified as low-value tangible assets and software equipment costing less than TCZK 60 is classified as low-value intangible assets. The acquisition costs of these assets are charged to expenses and their physical balances are maintained in off-balance sheet records, the only exception being electricity meters that are recognised and depreciated as tangible fixed assets.

Technical improvements

Major expenses incurred to replace parts of individual items of fixed assets increase the carrying value of the related assets. Other subsequent costs are capitalised only if they result in the increase in the future economic value of the related asset. All costs related to routine repairs and maintenance are charged to expenses.

Depreciation and amortisation

Fixed assets are depreciated for accounting purposes using the straight-line method over the following depreciation periods:

| Asset category | Depreciation period |
|--|-----------------------------|
| Buildings, halls and other structures | 20, 50, 70 |
| Cable tunnels, cables and overhead power lines | 30, 40, 70 |
| Fibre optics | 30 |
| Power structures | 15, 30 |
| Working machines and equipment | 4, 5, 8, 10, 12, 20, 29, 30 |
| Telecommunication equipment | 4, 8, 15 |
| Machinery and special technology equipment, communication cables | 4, 6, 8, 10 |
| Electricity meters | 15 |
| Vehicles | 4 |
| Furniture and fixtures | 4, 6, 8 |
| Hardware and software | 4, 8, 15 |
| Other intangible assets | 4 |

Short-term receivables

Short-term receivables are stated at their nominal value less provisions.

Investment contributions

Customers pay part of the cost incurred reasonably by the Company upon being connected to the required power supply. The customers' obligation to pay this fee is stipulated in Act No. 458/2000 Coll., and Regulation No. 51/2006 Coll., as amended. The payment is accounted for as deferred income over 20 years.

Cash and cash equivalents

Cash and cash equivalents include cash, cash in transit, current bank accounts and other current highly liquid financial assets whose value can be easily determined and are easily convertible into cash. Cash pooling is regarded as a cash equivalent for the cash flow purposes.

Adjustments to the value of assets

At each balance sheet date, the Company reviews the carrying amounts of its assets (with the exception of deferred tax assets) to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, an adjustment is recorded to reflect the impairment of the asset.

Share capital

Issued shares

The Company issued registered ordinary shares (refer to the note on equity).

Dividends

Dividends are recognised as payable in the period when the distribution of profit was approved.

Cash pooling

The Company participates in the parent company's cash pooling. Interest arising from cash pooling is recorded as interest income or interest expense as appropriate. The remaining balance of cash pooling is reported as a receivable from or a payable to the parent company. Cash pooling is regarded as a cash equivalent for the cash flow purposes.

Provisions

058

Provisions are recognised in the balance sheet when the Company has a legal or constructive obligation as a result of a past event and an outflow of cash is likely.

Short-term payables

Short-term payables are stated at their nominal value.

Revenue recognition

Revenue from provided services is recognised in the income statement when the services are rendered.

Expense recognition

Operating leases

Operating lease payments are recognised in the income statement evenly over the lease period. Operating leases mostly comprise leases of administrative buildings, cable tunnels and non-residential premises where MV/LV transformer stations are placed.

Finance leases

Instalments for leased assets are accrued and expensed. Assets acquired after the termination of the lease are carried at acquisition or replacement cost.

Income tax

Income tax is recognised in the income statement and includes current income tax and the deferred tax.

Current income tax comprises the tax payable arising from the Company's performance in the current year and additional payments (or excessive payments) from prior periods arising from the difference between the estimated and actual tax in prior periods.

Deferred tax is accounted for using the balance sheet liability method. Deferred tax arises from all temporary differences between the accounting and tax carrying amounts of all assets and liabilities using the tax rate that is expected to apply when the assets are realised or the liabilities are settled.

A deferred tax asset is recognised only to the extent that it is probable that it will be utilised in the following accounting periods.

Cash flow statement

The Company prepares its cash flow statement using an indirect method. Cash pooling is regarded as a cash equivalent for the cash flow purposes.

Significant accounting estimates

The presentation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the balance sheet date and the reported amounts of revenues and expenses during the reporting period. Management of the Company has made these estimates and assumptions on the basis of all the relevant information available to it. Nevertheless, pursuant to the nature of estimates, the actual results and outcomes in the future may differ from these estimates. The Company considers the determination of the unbilled distribution of electricity the key area which is subject to the use of estimates. The increase in unbilled distribution is determined using the balance sheet approach as equal to the difference between the aggregate electricity input and output including losses and actual consumption for the relevant period. The total closing level is additionally reviewed by making a control calculation in the customer system.

Significant accounting events

As of 1 January 2019, activities from the Support Services section were separated from the company Pražská energetika, a.s., and activities of the Construction Management department and the Diagnostic and Measurement department were separated from the Company and contributed to PREservisní, s.r.o. The first impetus for these changes was the development of legislation, the external environment and the need to effectively comply with regulatory requirements of the relevant legislation. The side-effect of these changes is the optimisation of selected activities and processes as part of customer service or in case of network construction.

(1) Revenues (TCZK)

| Relating to the supply of distribution services and other revenues | 2019 | 2018 |
|---|-----------|-----------|
| Sale of distribution and system services to B2B customers | 3,429,422 | 3,506,619 |
| Sale of distribution and system services to B2C (including low voltage B2B) | 6,185,145 | 6,051,690 |
| Other revenues | 11,241 | 11,297 |
| Revenues relating to the supply of distribution services | 9,625,808 | 9,569,606 |
| Revenue from services rendered in the Group | 21,070 | 18,651 |
| Revenue from services rendered outside the Group | 18,127 | 79,215 |
| of which: servicing and installation | 12,104 | 74,197 |
| leases | 3,966 | 4,054 |
| Other revenues | 39,197 | 97,866 |
| Total | 9,665,005 | 9,667,472 |

| Other operating revenues | 2019 | 2018 |
|---|---------|---------|
| Release of connection fees accruals | 187,779 | 191,319 |
| Compensation for unauthorised consumption | 11,565 | 12,586 |
| Sundry | 15,640 | 10,949 |
| Total | 214,984 | 214,854 |

(2) Personnel expenses (TCZK)

| | 2019 | 2018 |
|---|---------------|---------------|
| | Employees and | Employees and |
| | executives | executives |
| Average headcount | 455 | 501 |
| Salaries | 277,300 | 285,426 |
| Salaries paid depending on the Company's goal performance | 25,986 | 35,629 |
| Insurance | 111,265 | 118,422 |
| Remuneration paid to members of the Company's bodies | 13,440 | 13,308 |
| Other social costs (according to the collective agreement)* | 38,442 | 23,714 |
| Total | 466,433 | 476,499 |

^{*} This primarily includes the costs of severance payments and employee benefits defined in the collective agreement.

Specifically, the benefits include catering contributions, bonuses paid to employees in relation to work and life anniversaries and retirement and contributions to pension insurance.

| | 2019 | 2018 |
|---|-----------|-----------|
| Electricity consumption for grid losses* | 402,280 | 336,407 |
| Services of the parent company | 436,490 | 470,295 |
| Lease of non-residential premises | 63,672 | 68,167 |
| Lease of cars | 20,727 | 22,148 |
| Installation work and reading of meters | 229,081 | 216,438 |
| Customer service | 179,537 | 163,320 |
| IT support | 45,923 | 10,921 |
| Repairs of fixed assets | 70,771 | 23,907 |
| Sundry | 25,044 | 11,783 |
| Costs of purchase of material, services and utilities in the Group | 1,473,525 | 1,323,386 |
| Purchase of distribution and system services | 4,319,503 | 4,316,505 |
| Consumed material and energy | 30,079 | 43,215 |
| Repairs of fixed assets | 177,767 | 268,513 |
| Lease of cable tunnels | 110,019 | 107,789 |
| Lease of non-residential premises | 34,520 | 33,157 |
| Sundry | 77,737 | 95,382 |
| Costs of purchase of material, services and utilities outside the Group | 4,749,625 | 4,864,561 |
| Total | 6,223,150 | 6,187,947 |

^{*} Electricity grid losses and own electricity consumption are technologically related. These costs cannot be reliably separated and are therefore presented on an aggregate basis in "Electricity consumption for grid losses".

(4) Interest income and expense (TCZK)

| Interest income: from cash pooling | 934 | 349 |
|-------------------------------------|-----------|-----------|
| Interest expense: from cash pooling | (8,158) | (4,635) |
| from loans in the Group* | (107,081) | (97,300) |
| from employee benefits | (1,387) | (1,947) |
| other | - | (8) |
| Total (net) | (115,692) | (103,541) |

^{*} In addition to interest expense, part of the borrowing costs also included capitalised interest of TCZK 6,921 for 2018 (2018: TCZK 8,870), which is included in the acquisition cost of assets.

(5) Income tax (TCZK)

| Effective tax rate | | 2018 | | |
|---|-----------|---------|-----------|---------|
| Profit/loss for the period | 1,442,957 | | 1,428,972 | |
| Income tax | 333,685 | | 338,397 | |
| Profit before tax | 1,776,642 | | 1,767,369 | |
| Income tax using the applicable income tax rate | 337,562 | 19.00% | 335,800 | 19.00% |
| Impact of items that are never tax-deductible | (3,806) | (0.21)% | 2,852 | 0.16% |
| Corrections of estimates of prior years' taxes | (71) | 0.00% | (255) | (0.01)% |
| Total income tax / effective tax rate | 333,685 | 18.79% | 338,397 | 19.15% |

The current income tax estimate for 2019 of TCZK 312,500 (2018: TCZK 310,000) was reduced by income tax prepayments of TCZK 300,987 (2018: TCZK 280,339) and the net payable is recorded in the income tax provision.

| Payables to the state | 2019 | 2018 |
|--|--------|--------|
| Social security and health insurance liabilities | 10,357 | 10,482 |
| Tax liabilities | 98,720 | 87,906 |

None of these liabilities are overdue.

| Utilisation/release of provisions in the current period | (33,653) | (46,499) | (8,477) | (88,629) |
| Balance on 31.12.2019 | 93,039 | 47,900 | 119,978 | 260,917 |
| Long-term provisions | 93,039 | - | 112,005 | 205,044 |
| Short-term provisions | - | 47,900 | 7,973 | 55,873 |
| Total | 93,039 | 47,900 | 119,978 | 260,917 |

Provisions are recognised in respect of the following:

- business risks arising from the operation of fixed assets;
- salaries include salaries paid in dependence on the fulfilment of the plan, charged to personnel expenses; and,
- employee benefits a provision for future liabilities arising from the collective agreement, principally retirement benefits, benefits for work and life anniversaries and unused optional benefits, charged to personnel expenses. The long-term portion of the liability was discounted at the balance sheet date.

(12) Deferred tax liability (TCZK)

Deferred tax assets and liabilities reported in the balance sheet:

Deferred tax assets (-) and liabilities (+) arising from the temporary differences between the accounting and tax values are attributable to the following items:

| | 2019 | 2018 |
|---|-----------|-----------|
| Fixed assets | 3,100,325 | 3,079,461 |
| Receivables | (1,897) | (1,533) |
| Provisions | (16,949) | (16,953) |
| Liabilities arising from the collective agreement | (22,107) | (22,859) |
| Total | 3,059,372 | 3,038,116 |

(13) Trade payables (TCZK)

The Company carries no trade payables past their due dates.

(14) Temporary liabilities (TCZK)

| Deferred revenues | |
|---|-----------|
| Balance on 31.12.2017 | 1,790,453 |
| Investment contributions received | 215,671 |
| Investment contributions accounted for in revenues | (191,319) |
| Correction factor of permitted revenues | 105,080 |
| Balance on 31.12.2018 | 1,919,885 |
| Investment contributions received | 203,711 |
| Investment contributions accounted for in revenues* | (187,779) |
| Correction factor of permitted revenues** | 15,711 |
| Balance on 31.12.2019 | 1,951,528 |

^{*} Investment contributions accounted for in revenues are part of "Other operating revenues" in the income statement.

(15) Leased assets (TCZK)

Operating leases

As disclosed in the accounting policies, assets held by the Company under operating leases predominantly include HV and MV cable conduits, non-residential premises for MV/LV transformer stations and administrative buildings. The lease contracts have been concluded for an indefinite period of time.

The table below shows the aggregate annual costs of these leases.

| | 2019 | 2018 |
|--------------------------|---------|---------|
| Cable conduits | 110,019 | 107,789 |
| Non-residential premises | 34,520 | 33,157 |
| Administrative buildings | 63,672 | 68,167 |
| Vehicles | 21,473 | 22,906 |
| Total | 229,684 | 232,019 |

^{**} This involves part of revenues from distribution services associated with the delivery of distribution services in 2020 and 2021.

(16) Fees payable to auditors (TCZK)

Fees payable to auditors for a statutory audit of the financial statements for the period ended on 31 December 2019 were TCZK 990 (31.12.2018: TCZK 990).

(17) Related parties (TCZK)

Persons having managing authority include the members of the Board of Directors, the Company's management and the members of the Supervisory Board.

Some of the members who have managing authority use company cars for both business and private purposes.

Total bonuses for the members of the statutory and supervisory bodies and the senior management:

| | 2019 | 2018 |
|-----------------|--------|--------|
| Number | 8 | 8 |
| Bonuses in TCZK | 24,975 | 24,847 |

Transactions with the members of the statutory bodies and the executive management

As of 31 December 2019, the Company recorded receivables from the members of the Board of Directors and the Supervisory Board in the aggregate amount of TCZK 8 (2018: TCZK 21). These receivables were settled during January 2019.

074 (19) Cash flow statement

For the purposes of the cash flow statement, cash and cash equivalents are defined to include cash in hand, cash in transit, cash at the bank and other financial assets whose valuation can be reliably determined and that can be readily converted to cash. Receivables and payables from cash pooling that are reported in "Short-term receivables – group undertakings" and "Short-term payables – group undertakings" are also deemed cash and cash equivalents for the cash flow statement purposes. The balances of cash and cash equivalents as at the year-end are as follows:

| | В | Balance on 31.12. | | |
|--------------|-----------|-------------------|--|--|
| | 2019 | 2018 | | |
| Cash | 1,563 | 1,485 | | |
| Cash pooling | (460,555) | (48,586) | | |
| Total | (458,992) | (47,101) | | |

(20) Material subsequent events

On 11 March 2020, the World Health Organisation declared the coronavirus outbreak a pandemic, and the Czech government declared a state of emergency on 12 March 2020. Responding to the potentially serious threat the COVID-19 presents to public health, the Czech government authorities have taken measures to contain the outbreak (restrictions on the movement of people, restrictions or interruption of production or of the provision of services in selected industries, etc.).

The Company is a member of the PRE Group which ensures the supply (distribution), production and sale of energies and services relating to them on the territory of the capital city of Prague and the entire Czech Republic. In connection with the coronavirus pandemic, PRE Group's management expects a decline in the sale of commodities and other energy services, an increase in the credit risk of its customers or the risk of concluded contracts becoming loss-making as a result of the development of the foreign exchange rate. The PRE Group has introduced measures to prevent operational risks, such as dividing critical departments into shifts that do not come into physical contact, etc. PRE Group's management assumes that even if our corporate customers experience a production shortfall of several months, the PRE Group will be able to achieve profit for 2020, and that the going concern principle of the PRE Group will not be endangered.

As the Company's principal activity is electricity distribution, especially in the Prague region, this activity represents a substantial part of the Company's revenues. Electricity distribution is carried out in the public interest, and the rights and obligations relating to this activity are regulated by Energy Act No. 458/2000 Coll. as amended and its rules of application apart from general legal regulations. In connection with the coronavirus pandemic, the Company's management expects a temporary decline in distributed electricity, primarily in the corporate customer segment. As a substantial part of revenues is realised within the PRE Group or from relationships with other crucial power suppliers in the Czech Republic with a high credit rating, the Company's management does not regard the increase in the credit risk as significant.

The Company's management does not anticipate a significant decline in revenues or other substantial adverse effects impacting on the Company's operation, financial position and operating results. However, the Company's management cannot preclude the possibility that extended lock down periods, an escalation in the severity of such measures, or a consequential adverse impact of such measures on the economic environment the Company operates in may have an adverse effect on the Company, and its financial position and operating results, in the medium and longer term. The Company continues to monitor the situation closely and will respond to mitigate the impact of such events and circumstances as they occur.

No other events have occurred since the balance sheet date that would have any material impact on the financial statements.
